

Animation hour - Task sheet

Task:

Your task is to create a short 2-5 minute animated video using the internet program moovly. The animated video can be about a topic of your choice but should follow a short storyline of setting the scene, a problem occurring and solving the problem. Once you have planned your animated video you need to follow the steps in the process section to begin creating your moovly. Once you have finished creating your animated video follow the steps in process to download the video to the computer and save into your personal ICT challenge folder. Once finished log into the animation hour today's meet chat room and share one thing you learnt, one challenge you encountered and how you overcame that challenge.

Process:

1. Think about the topic for your animated video.
2. Make a short storyline plan on Microsoft word that explains the scene, the problem and the solution.
3. Open moovly in your internet browser – www.moovly.com
4. Create a new moovly account using your classroom email. Record your password on the teacher's moovly record roll.
5. Click on create new moov and give the video a title, description and category.
6. Select a template.
7. Create your animated video.

8. Once you have finished make sure you save your work.
9. Your video will appear in the moovly library and to save this you need to click on the little eye icon, click on download and then download as MP4.
10. Once your animated video has downloaded onto the computer save the downloaded file into your personal ICT challenge folder as the title of your video.
11. Log into the animation hour todays meet chat room and share one thing you learnt, one challenge you encountered and how you overcame the challenge.

Teacher tip:

Moovly has an online help chat room where you can ask for assistance if you need help creating your animated video.

Remember classroom netiquette rules apply when communicating within the todays meet chat rooms.
